Policy document for Green Campus

The concept of green campus gives an opportunity to the institution in inculcating environmentally friendly practices and education by developing new paradigms to promote sustainable and eco-friendly practices in the campus.

Goals:

1. Development on a self-sustainable basis in the areas of power, water and cleanliness
2. Awareness creations about environmental issues including climate change among faculty and students
3. Measure and reduce the environmental emissions / footprints

Plan of Achievement:

To achieve the above said goals Trichy SRM Medical College Hospital and Research Centre (TSRMMCH&RC) has focussed in three major areas which are

- a. Waste Management
- b. Water Management
- c. Climate change

a. Waste Management:

- To adopt appropriate methods for waste segregation and arranging appropriate bins for collection across the campus.
- To follow the waste management policy in the management of various wastes generated in the campus.
- To have MOU's with appropriate agencies for safe collection and disposal of biomedical waste and e-waste from the campus.
- To follow plastic usage policy and to take action towards reducing the consumption of single use plastics in the campus.
- Encourage recycling/reuse of paper and thus reducing the paper consumption and recycling of plastics and other materials as per the institutional policy.

b. Water Management:

- Designing a policy for water conservation which aim to RRR (Reduce consumption, Reuse, Replenish) the water through,
 - i. Rainwater harvesting.
 - ii. Wastewater recycling and usage for watering the plants and toilet flushes.
 - iii. Identifying and changing damaged taps thus preventing the water wastage.

c. Climate Change:

- Appropriate actions taken for reducing the environmental emissions as well as conserve the environmental resources through,
 - i. Development and use of alternate sources of energy like solar energy, biogas production from solid waste generated.
 - ii. Use of energy efficient lamps like LED bulbs wherever possible.
 - iii. Monitoring the entry of vehicles in the college and promoting use of battery-operated vehicles for in campus transit.
 - iv. Arranging and undergoing frequent green audits to keep a check on carbon emissions and design effective policies for reducing the same.
 - v. Creating awareness among students related to climate change, environmental protection, and environmental issues.
